## Education

### University of Houston

PH.D. IN COMPUTER SCIENCE

Face Recognition, Biometrics, Computer Vision, Deep Learning, Machine Learning, Pattern Recognition

Houston, TX, USA

Aug. 2014 - Present

### Beijing University of Posts and Telecommunications

B.S. IN TELECOMMUNICATION ENGINEERING

Telecommunication, Application Development

Beijing, China

Sept. 2009 - June. 2013

## Experience

### Amazon AWS AI

APPLIED SCIENTIST INTERN

New York City & Seattle, WA

Summer, 2017 & 2018

- Forecasting with deep learning techniques;
- Domain Adaptation for Image Classification: Proposed novel algorithms for domain adaptation for different scenarios and outperformed state-of-the-art performance by a large margin [C2].

### University of Houston

RESEARCH ASSISTANT AT COMPUTATIONAL BIOMEDICINE LAB

Houston, TX, USA

Aug. 2014 - Present

- **2D Face Recognition [C1]** Tools: Python, MXNet
  - Performed and analyzed the current state-of-the-art face recognition algorithm on the Images with occlusions;
  - Proposed a plug-and-play attention module that helps to extract local discriminative features from non-occluded facial region;
  - Proposed a novel template generator that improves the face recognition performance on the occluded facial images.
- **3D-Aided 2D Face Recognition [C6, J3]** Tools: C++, Qt, OpenCV, 3D-AFM, Caffe
  - Designed and implemented CBL 3D-Aided 2D face recognition system in C++, which is modular, easy to use, and easy to maintain. The modules include face detection, 2D face alignment, 3D model fitting, and face frontalization. To accelerate computation, it makes use of OpenMP for CPU and CUDA for GPU. The SDK is based on the libraries of OpenCV, Pittpatt5, Dlib, and Caffe.
  - Created several applications such as enrollment and comparison.
  - Lead the team to create live demos to present this pipeline.
- **3D Face Reconstruction [C3, J4]** Tools: Python, MXNet
  - Proposed a feature aggregation learning network to predict the shape and expression parameters of 3D face model, which leverages the features from different layers from the backbone network such as ResNet-101;
  - Achieved 16% improvement on BU-3DFE and 10% improvement on JNU-3D comparing the state-of-the-art algorithms.
- **2D Face Analysis [C7]** Tools: Python, TensorFlow
  - Proposed a hierarchical framework to estimate head pose and facial landmarks jointly in a coarse-to-fine manner. It first estimates the coarse head pose and localizes primary landmarks using global CNN features. With this rough head pose estimation and initial landmarks, local CNN features are extracted from images patches to refine the pose estimation and update facial landmark localization.
- **2D Face alignment [C8]** Tool: MATLAB
  - Proposed a novel method for face alignment method on 2D images by combining the facial component classification and cascaded regression. The face component classification is used for deriving a better initialization for regression. An ensemble of random ferns is applied to encode the local facial features for global shape regression.

## Professional Service

- Reviewer**, International Journal of Computer Vision, Neurocomputing, Signal Processing, Computer Vision and Pattern Recognition, European Conference on Computer Vision, International Conference of Image Processing, Automatic Face and Gesture Recognition
- 2018
- Reviewer**, Computer Vision and Pattern Recognition, Automatic Face and Gesture Recognition, Medical Image Computing and Computer Assisted Intervention
- 2017
- Reviewer**, Computer Vision and Pattern Recognition, Medical Image Computing and Computer Assisted Intervention
- 2016
- Reviewer**, Computer Vision and Pattern Recognition
- 2015
- Reviewer**, Asian Conference on Pattern Recognition
- 2014

## Skills

**Programming** C/C++, Python, MATLAB, JAVA, Lua, Objective-C, SQL

**Tools** MxNet/Gluon, TensorFlow, Pytorch/Torch, Caffe, OpenCV, Qt, Git, OpenBR

## Honors & Awards

- |      |  |                |
|------|--|----------------|
| 2017 | <b>Doctoral Consortium</b> , IJCB 2017   | Denver         |
| 2017 | <b>Doctoral Consortium Travel Grant</b> , FG 2017  | Washington, DC |
| 2013 | <b>Special Prize (11/10k+, 1%)</b> , Campus group, China mobile application developing competition | Beijing, China |
| 2013 | <b>3rd Award (8/142, 6%)</b> , BUPT Imagine Award  | Beijing, China |
| 2011 | <b>3rd Award</b> , National area, Google Android Application Development Challenge                 | Beijing, China |
| 2011 | <b>3rd Award</b> , BUPT Mobile Internet Creative Competition                                       | Beijing, China |
| 2011 | <b>2nd Award</b> , Beijing area, Google Android Application Development Challenge                  | Beijing, China |
